

CalciumK2

natural BONE support

Everyone needs calcium, especially women.

Unfortunately, most sources of calcium aren't easily assimilated into your body and often contain large amounts of lead. Avoiding lead in calcium is extremely important!

Calcium K2's unique formula is designed to provide pure calcium and six other major minerals, including vitamin K2 and D3, needed to support healthy bones and help your body to assimilate calcium.

FEATURES & BENEFITS

- Supports Bone & Tooth Health.
- Assists Nervous System Functions.
- Helps Create Strong Bones.
- May Increase Bone Density.
- May Increase Bone Density.
- Guards Against Calcium Depletion.
- May Prevent Calcification of Arteries.
- Contains Easy to Digest Calcium.

CalciumK2™ takes a cutting-edge blend of superior forms of calcium, combines it with other nutrients offering enhanced calcium absorption and delivers a supplement with potent and powerful skeletal support. Scientifically proven to aid in calcium absorption, the highly effective ingredients in CalciumK2™ provide your body with peak bone and circulatory system performance. Fortify your day and strengthen your life with CalciumK2™.
