

Enhanced Muscle Protein Synthesis Support

Patented, Clinically Proven Formula

SiselRIPT™ provides the optimal ratio of essential amino acids for maximum muscle growth and development. Backed by years of proven research and trials, our incredible muscle product gives you the edge you need when you need it most.

MORE FOR YOUR MUSCLE

SiselRIPT™ offers a state-of-the-art way for you to grow, repair and maintain muscle mass. Created with long-term muscle health in mind, **SiselRIPT™** is designed to support optimal muscle protein synthesis. With more than \$20 million in research and 23 human trials, this unique, patented formula is clinically proven to provide superior muscular growth, regeneration, and conditioning.

THE MYSTERY OF MUSCLE PROTEIN SYNTHESIS

Our muscles rebuild and regrow through a process called Muscle Protein Synthesis. Amino acids are the building blocks for this process, but not all amino acids are equal. Your body easily produces most amino acids as it needs them; but some—called Essential Amino Acids (EAA)—cannot be produced and must be included in our diet in order for our bodies to use them to build protein. Scientists have determined that the efficiency of Muscle Protein Synthesis is dependent on the ratio of EAA involved in the synthesis. If the ratio is too high, oxidation can occur. Too low and the body cannibalizes the EAA from other muscles or organs. Many products have tried, but none have come close to this super-efficient ratio. Until now.

THE PERFECT RATIO

Based on these multi-million dollar studies, **SiselRIPT™** is able to provide the most efficient ratio of Essential Amino Acids needed for Muscle Protein Synthesis. One 5g serving offers more support for muscle growth than larger doses of many other muscle building products.

WORK HARDER, RUN LONGER, BE STRONGER
